# ABOUT US

PITCH DECK

Paypilot is a next generation payment gateway built to power seamless, secure and scalable transactions for businesses of all sizes.

Designed with speed and simplicity at it's core Paypilot streamline digital payments through intelligent routing, fraud protection, and real time analytics ensuring maximum conversion and customer trust.

whether you're a startup or a enterprise, our API first platform adapts to your growth enabling frictionless Integration across web, mobile, and in store channels. At Paypilot we're not just processing payments we are fueling the future of commerce

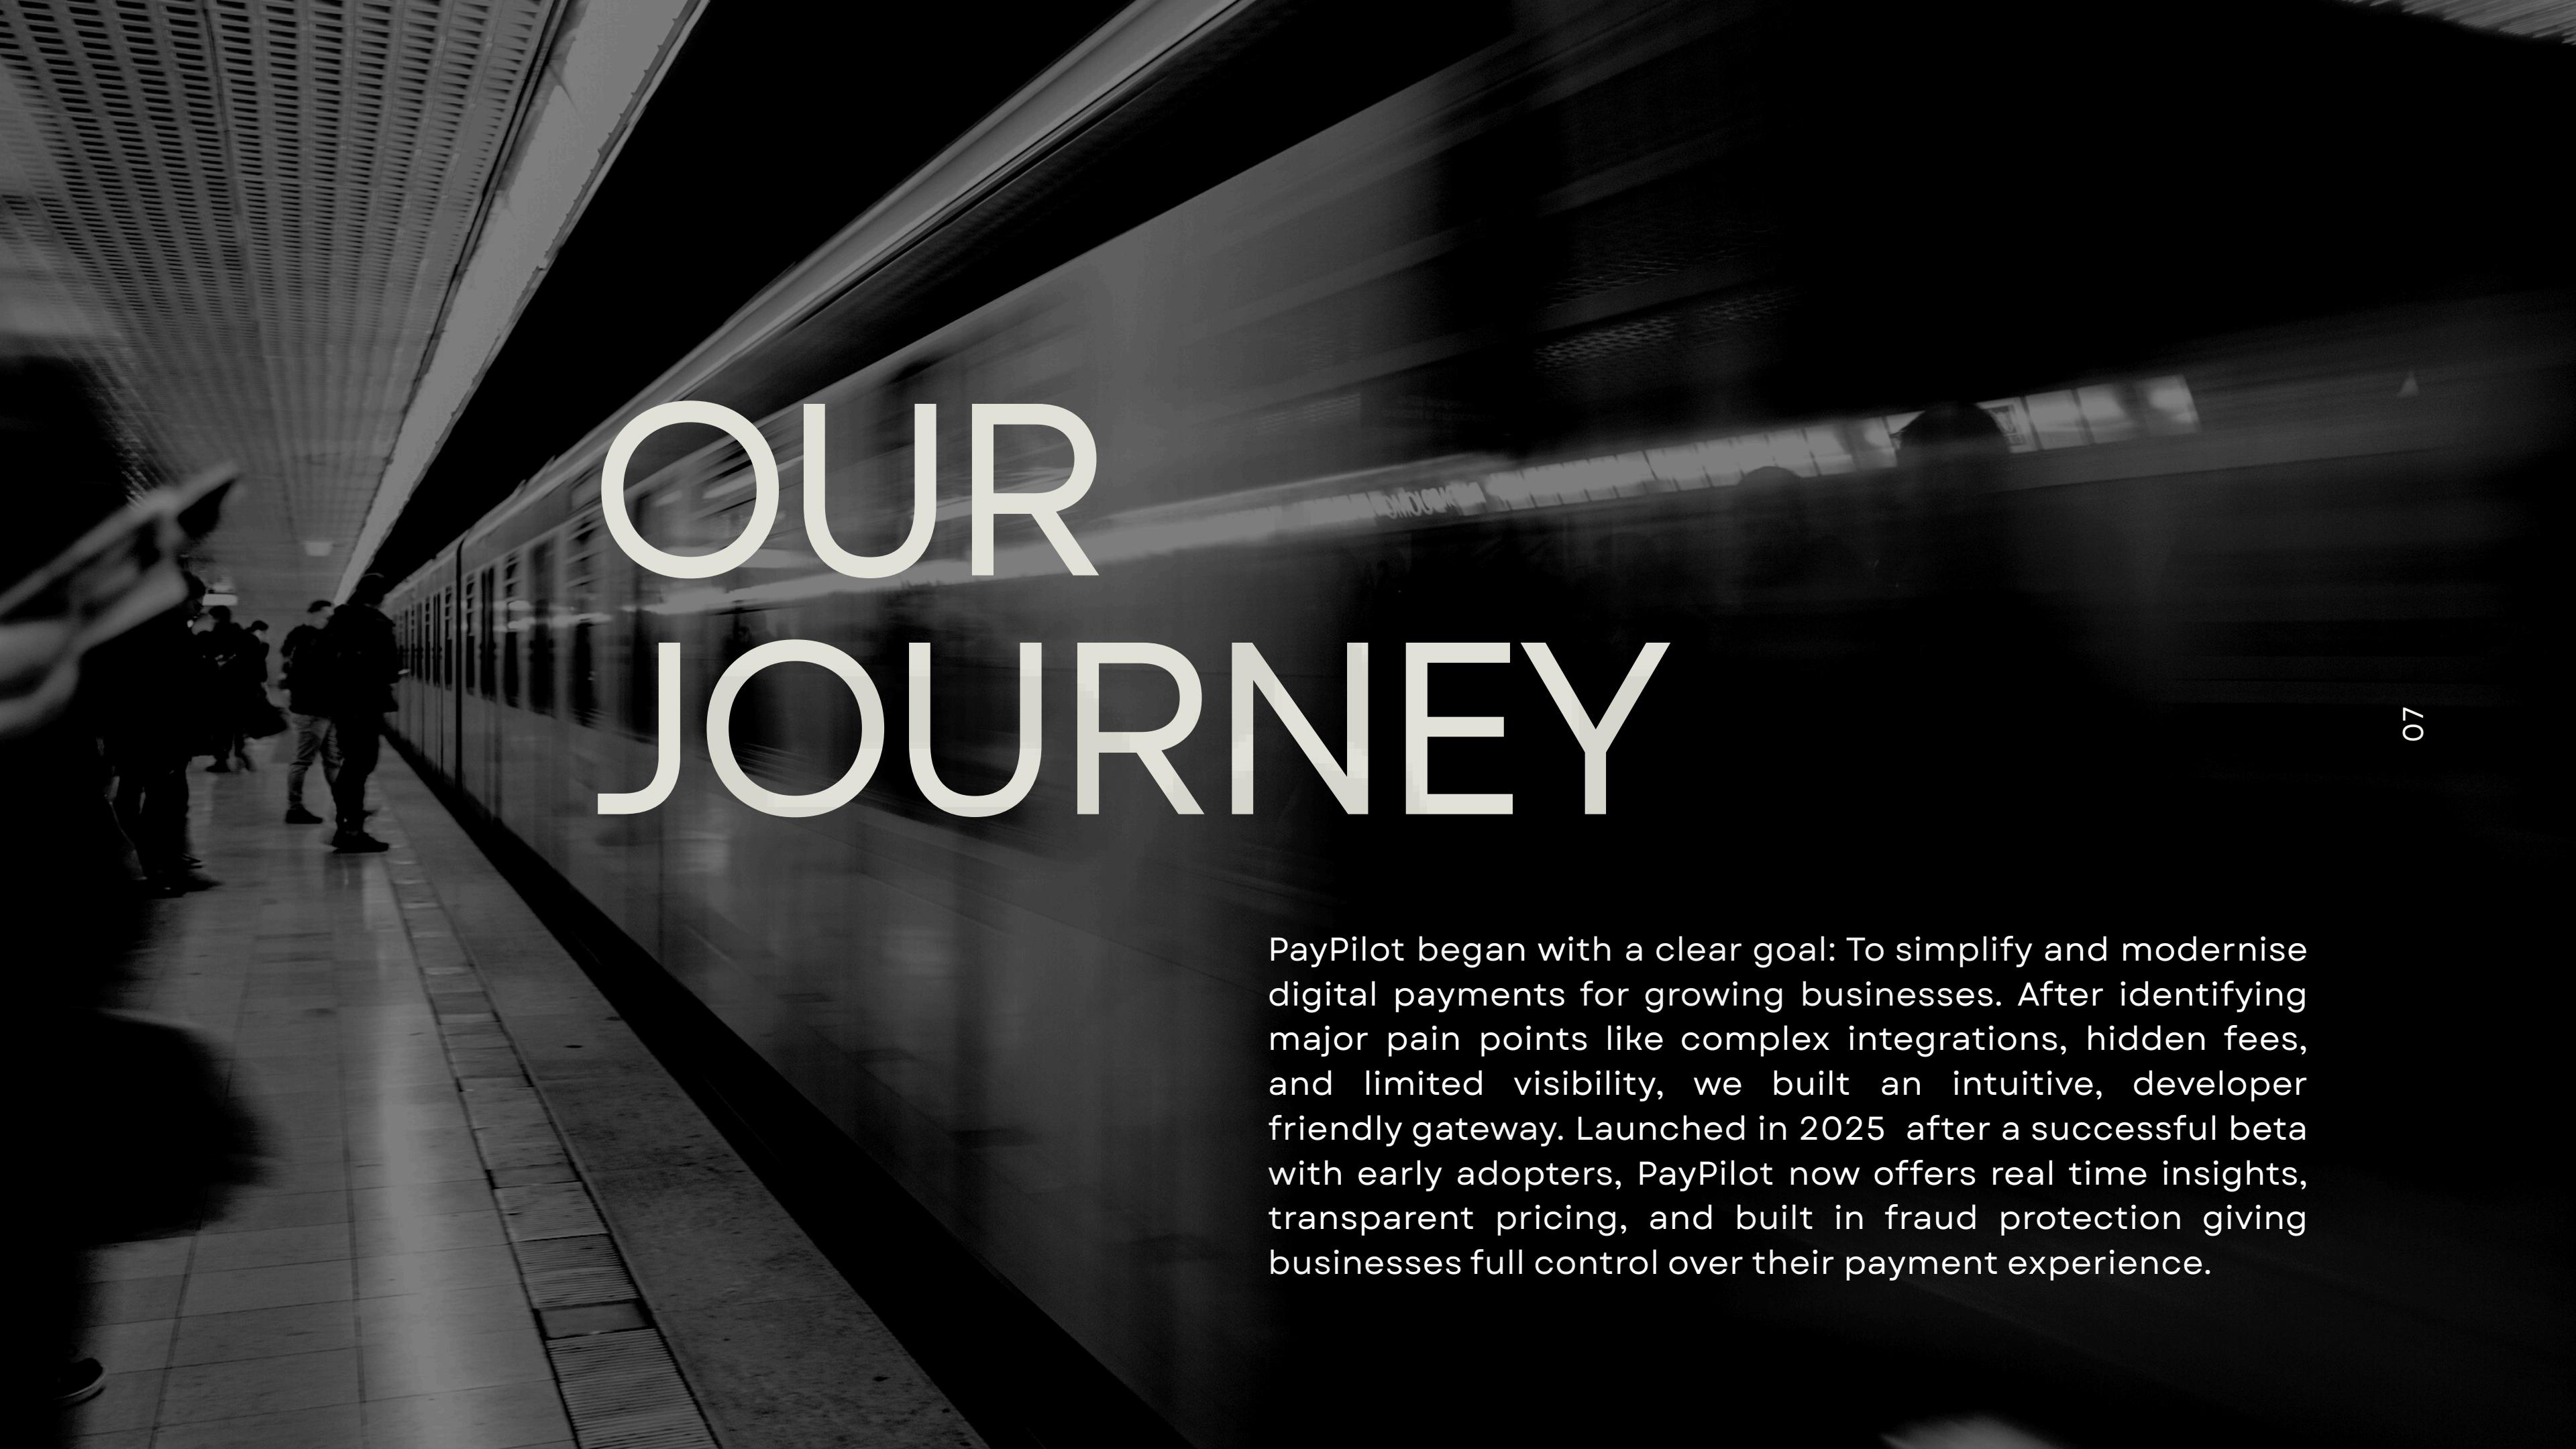

## Vision

To become the most trusted and innovative global payment infrastructure, empowering businesses everywhere to transact with speed, simplicity, and security.

05

## Mission

To simplify digital payments by delivering a seamless ,secure and intelligent gateway that helps business grow.We aim to redefine the payment experience through cutting edge technology, transparent pricing and exceptional developer and merchant support enabling frictionless commerce in digital first world

# OUR JOURNEY

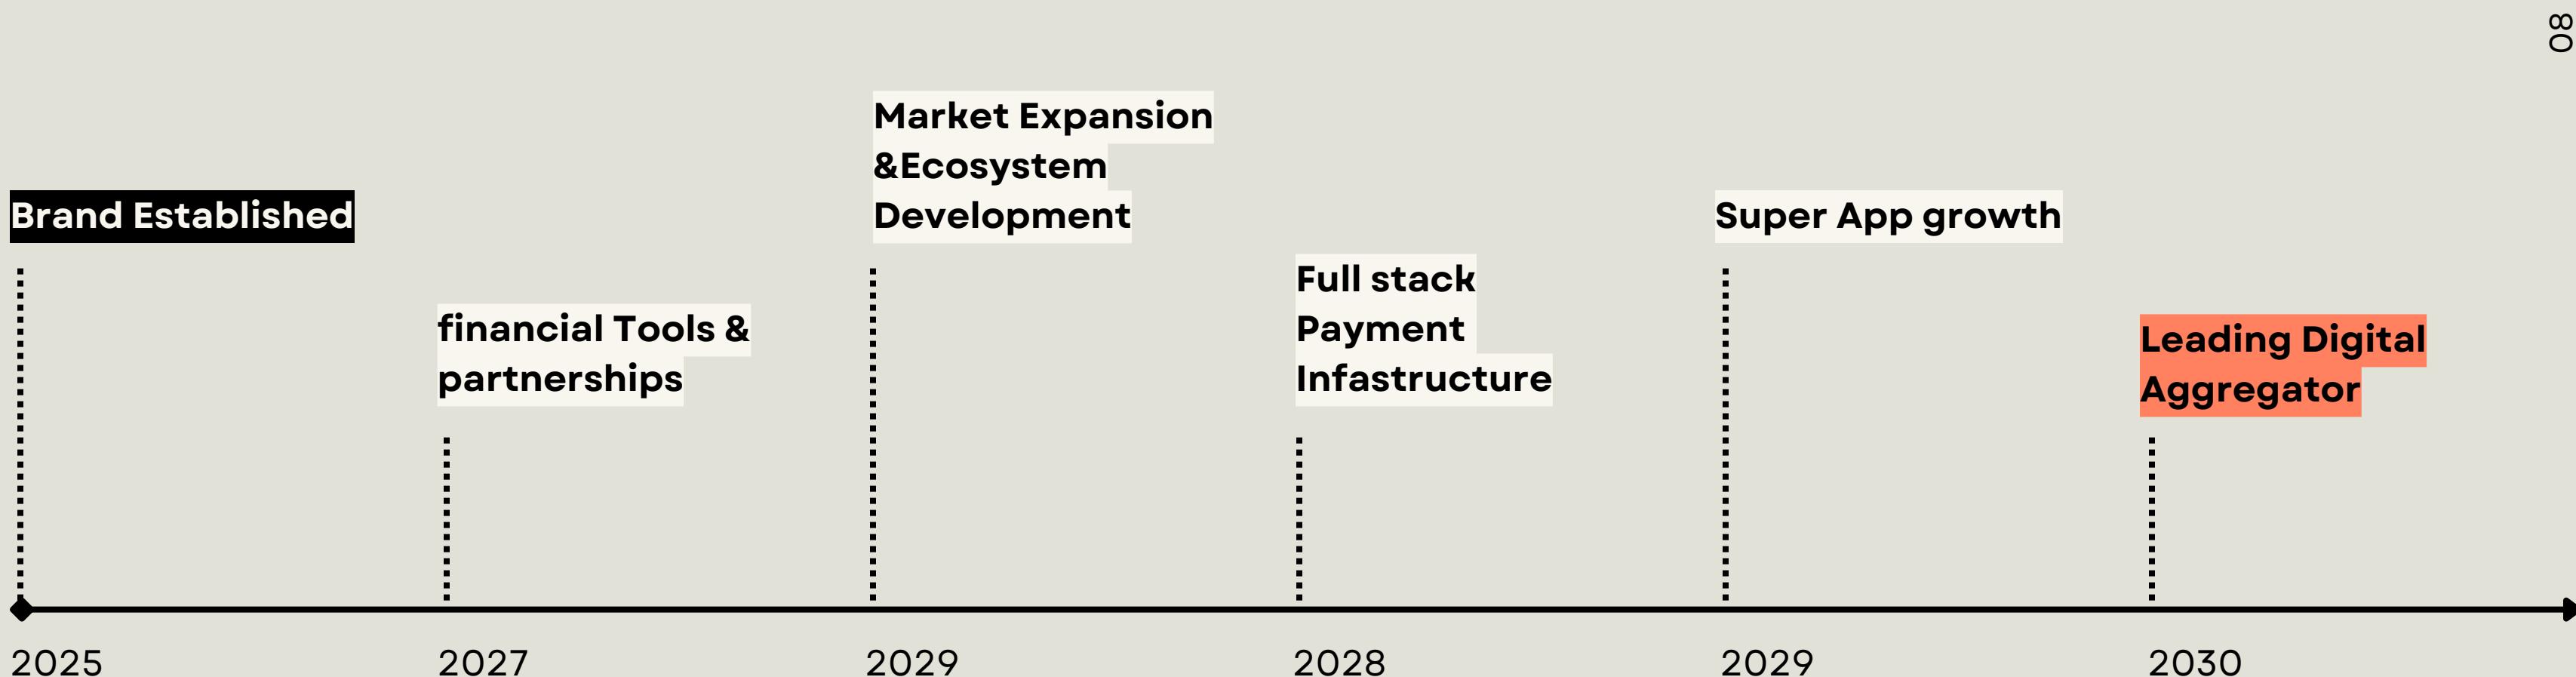

70

PayPilot began with a clear goal: To simplify and modernise digital payments for growing businesses. After identifying major pain points like complex integrations, hidden fees, and limited visibility, we built an intuitive, developer friendly gateway. Launched in 2025 after a successful beta with early adopters, PayPilot now offers real time insights, transparent pricing, and built in fraud protection giving businesses full control over their payment experience.

# Road Map

Starting with a strong payment gateway launch in 2025, PayPilot will quickly add multi currency support, AI fraud detection, and merchant financial tools by 2027. From 2029, we'll expand into a digital super app offering bill payments, wallets, lending, and more.

By 2030, PayPilot aims to be a top global aggregator, integrating payments, finance, commerce, and lifestyle services for millions of users and businesses.

# The Challenge

- High transaction cost
- Fraud and security risk
- Delay Settlements
- Cash flow Management
- Fragmented payment systems

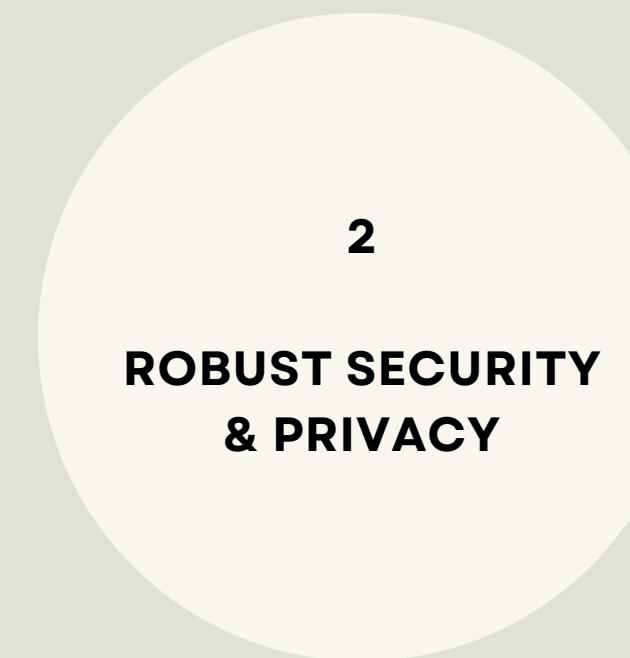

# Solution we Offer

- Frictionless checkouts
- Transparent transactions
- T+0 settlements
- Bank grade security
- 24/7 human support
- Same Day settlements
- 99% success rates

# Operating Principles

At our payment gateway, we prioritize a seamless and intuitive user experience by designing fast, frictionless checkout flows that work smoothly across all devices. We practice full transparency by clearly displaying all fees, transaction details, and policies upfront, building trust with every interaction. Security and privacy are built into everything we do, with end-to-end encryption, fraud protection, and compliance with global data standards to safeguard customer information. Finally, we're committed to reliability and always-on support—ensuring our platform is fast, stable, and backed by responsive 24/7 customer service that's ready whenever users need help.

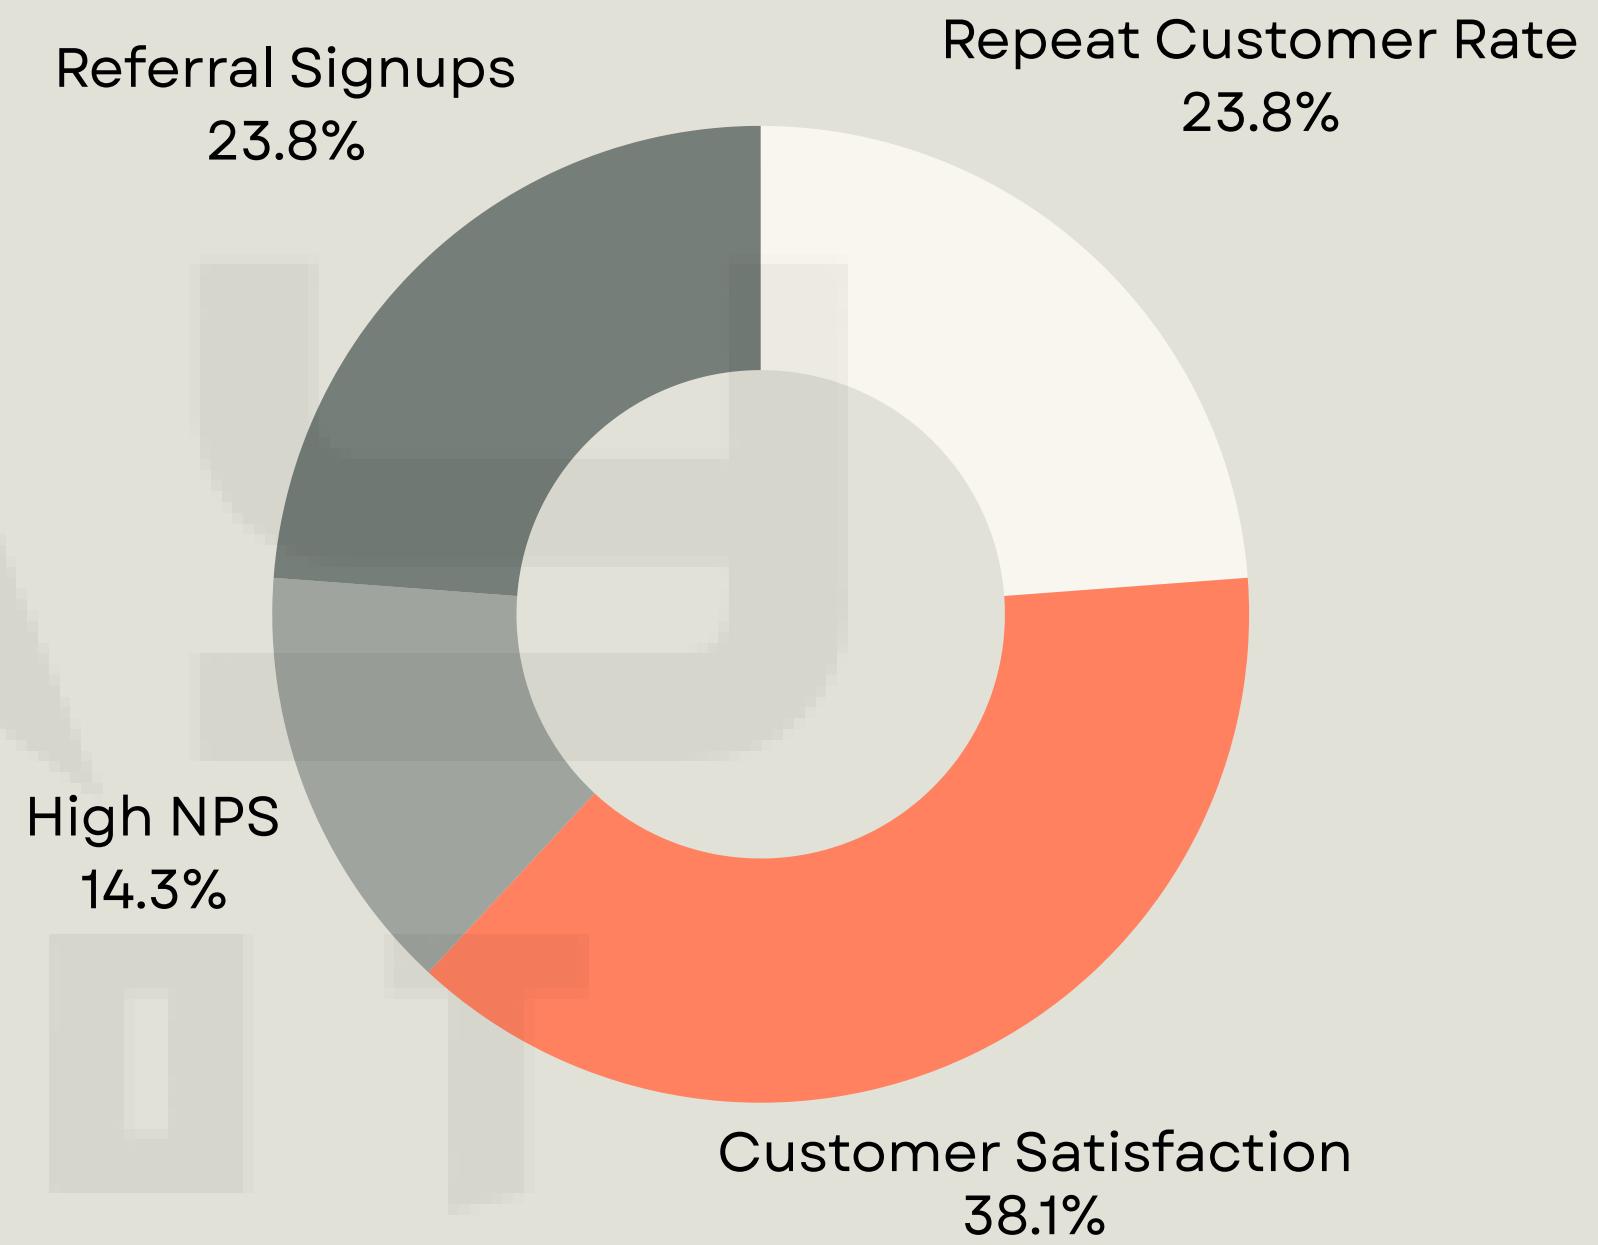

# Website based Payment gateway

Our web-based payment gateway offers a seamless and accessible platform for businesses to accept and manage digital payments without the need for a mobile app. Designed for simplicity and scalability, the platform supports multiple payment modes including UPI, cards, net banking, and wallets, all through a secure and mobile responsive website. Merchants can track transactions in real-time, generate payment links, manage refunds, and access detailed reports directly from the browser. With easy integration via REST APIs, plugins for e-commerce platforms, and a quick eKYC onboarding process, our solution is built to serve startups, small businesses, and offline merchants alike making digital payments fast, flexible, and accessible from anywhere.

# OUR IMPACT SO FAR

Our recent customer metrics clearly show that we've built strong trust and loyalty in a short period. A significant 40% of our users are repeat customers, highlighting the reliability and satisfaction they experience with each transaction. Additionally, 25% of new users come through referrals, proving that our existing customers trust us enough to recommend our services to others. With a customer satisfaction (CSAT) score consistently above 90%, users are clearly pleased with our seamless experience, fast payments, and responsive support. Finally, a high Net Promoter Score (NPS) further confirms that our users not only value our platform but are willing to actively promote it. These results affirm that our customer centric approach focused on transparency, security, and service is driving real loyalty and advocacy.

# WHY NOW?

The market is ready and demanding better payment experiences.

Growing global digital commerce.

Rising customer expectations for speed, transparency, and control.

Increasing regulatory focus on data rights and trust.

12

# LET'S REDEFINE PAYMENTS

We don't just process payments. We build trust, one transaction at a time.

Partner with us, pilot our solution, invest in this customer first future.
